DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 6,624,338 to Commereuc et al. (hereinafter "Commereuc").

Commereuc discloses isomerization of 1-butene to 2-butene and isomerizing 2-butene with ethylene in the presence of a ruthenium based catalyst to produce propylene (col. 3, lines 50-62).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.

4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 23-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 02/072920 (hereinafter "WO").

WO discloses an olefin metathesis process comprising contacting an unsaturated fatty acid ester or unsaturated fatty acid, i.e., cis-9-cis-12octadecadienoic, with a metathesis catalyst in the presence of ethylene to prepare a first product olefin (see Abstract; page 7, 1st paragraph; and page 11, 2nd paragraph thru page 16, 1st paragraph).

WO fails to explicitly disclose the claimed 1-octene product and a reactant Δ 9,11-octadecadienoic acid or a derivative thereof.

However, since the reference discloses the broad class of unsaturated fatty acid ester or unsaturated fatty acid, it would have been obvious to one skilled in the art that the reference would have included the specifically claimed reactant.

With regard to the products claimed, it would have been expected that the process of WO would have yielded the claimed products since the process in the reference is similar to the claimed process, i.e., similar reactant and similar catalyst.

Allowable Subject Matter

Claims 2, 3 and 5-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 12-22 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: no prior art was found to disclose or suggest the claimed step of isomerizing an unsaturated fatty acid or fatty acid derivatives prior to metathesizing the isomerized product.
